

matematicaMente

Benvenuti sulle schede didattiche di **MatematicaMente**!

1

IMPARIAMO I NUMERI

ALCUNI CONSIGLI PRIMA DI INIZIARE

1.

Utilizzate tutti gli aiuti che preferite:
cartoncini **colorati, mani, dadi, biscotti**
o qualunque cosa possa supportarvi
nell'apprendimento dei numeri!

2.

Abbiate **pazienza** e procedete con calma:
prima di passare agli step successivi,
assicuratevi di aver compreso tutto. Quando
necessario, **ripetete!**

3.

I numeri si possono imparare **ovunque!**
Esercitatevi quando volete per contare: a
casa, fuori, al supermercato o a scuola. **Le
opportunità sono tantissime!**

IL PRIMO PASSO: IMPARARE A CONTARE AIUTANDOSI CON I PITTOGRAMMI

Ad ogni numero viene dedicata una scheda didattica: si consiglia di stamparle e di farle entrare in gioco in momenti della quotidianità

Per imparare a contare, è necessario fare delle associazioni: prima si associa il numero al simbolo, e successivamente alla quantità

Per capire il concetto di quantità, è utile avere il supporto di oggetti di uso quotidiano; così permetteremo un'associazione duratura tra il numero e la quantità – e manterremo la possibilità di esercitare i numeri in ogni contesto!

COME PROCEDERE?

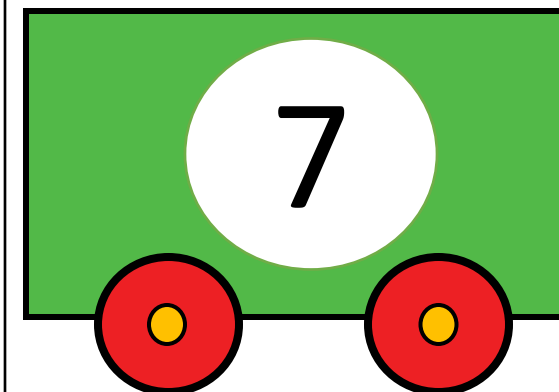

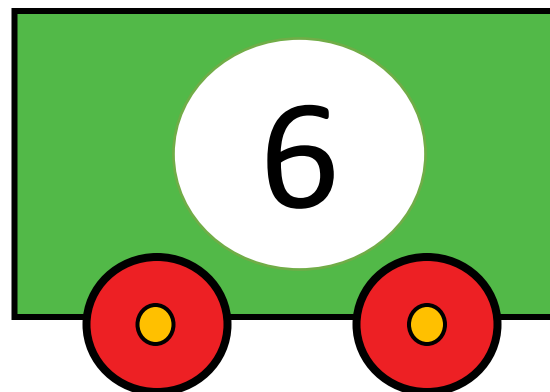

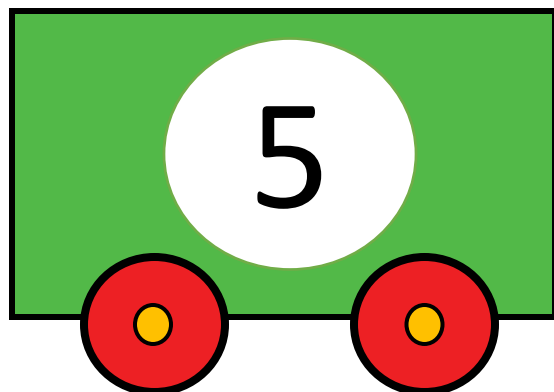

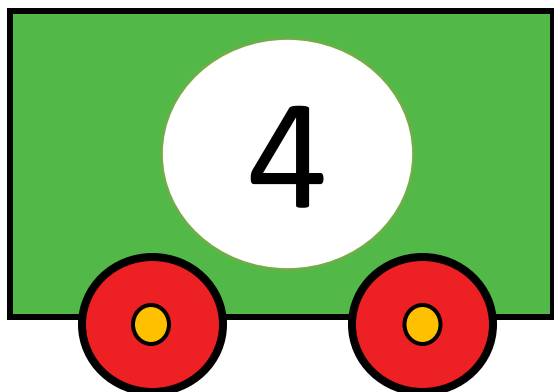

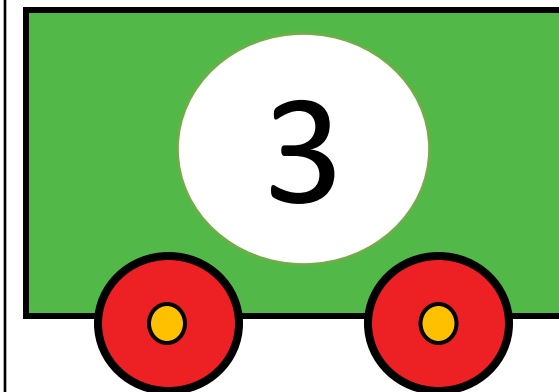

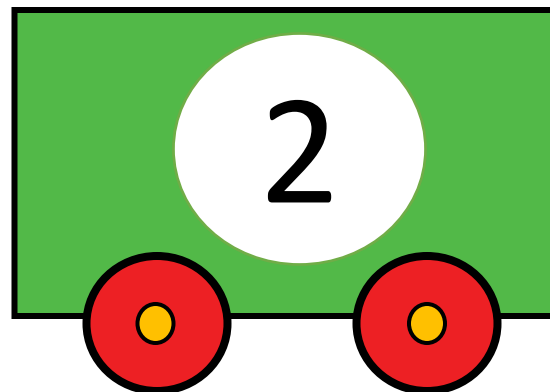

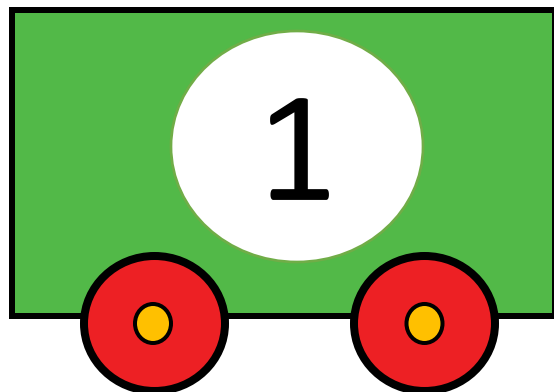

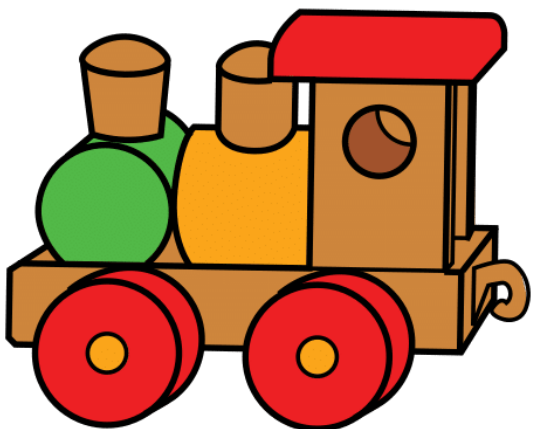

Un passo importante,
una volta imparati i numeri
e il conto da 1 a 10,
è rafforzare il concetto di
continuità numerica

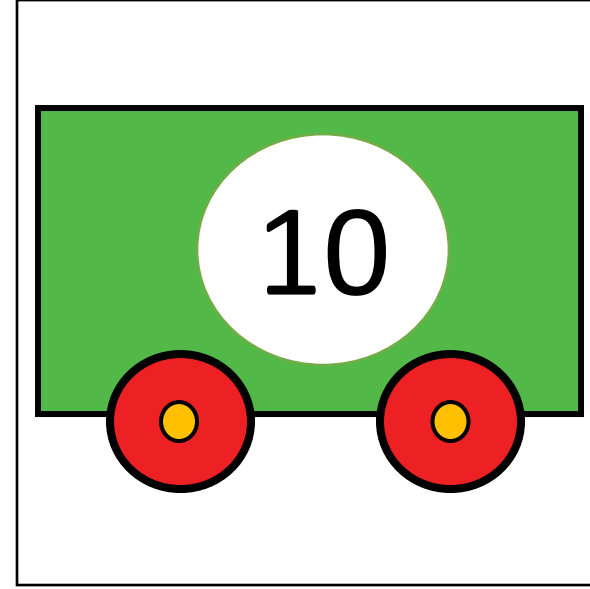

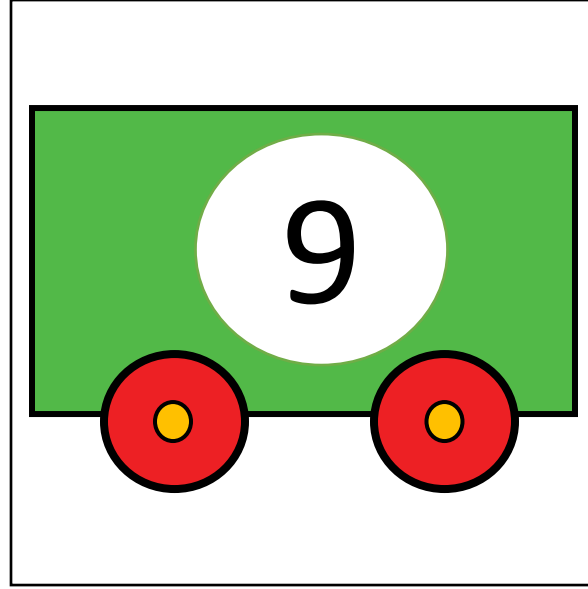

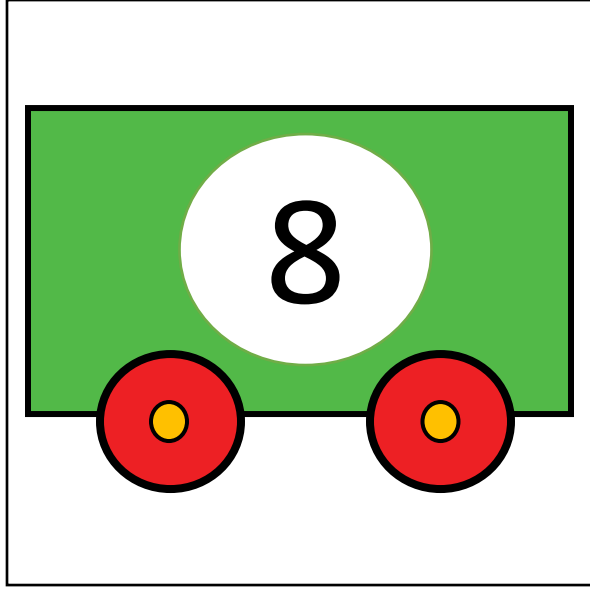

Con un trenino da
comporre passo passo:
forniamo nella pagina
seguente delle figurine
da poter stampare,
ritagliare e con cui
costruire un **trenino!**

COME FARE?

ECCO FATTO! IL TUO TRENINO È PRONTO!

IMPARARE A SCRIVERE I NUMERI

COME PROCEDERE?

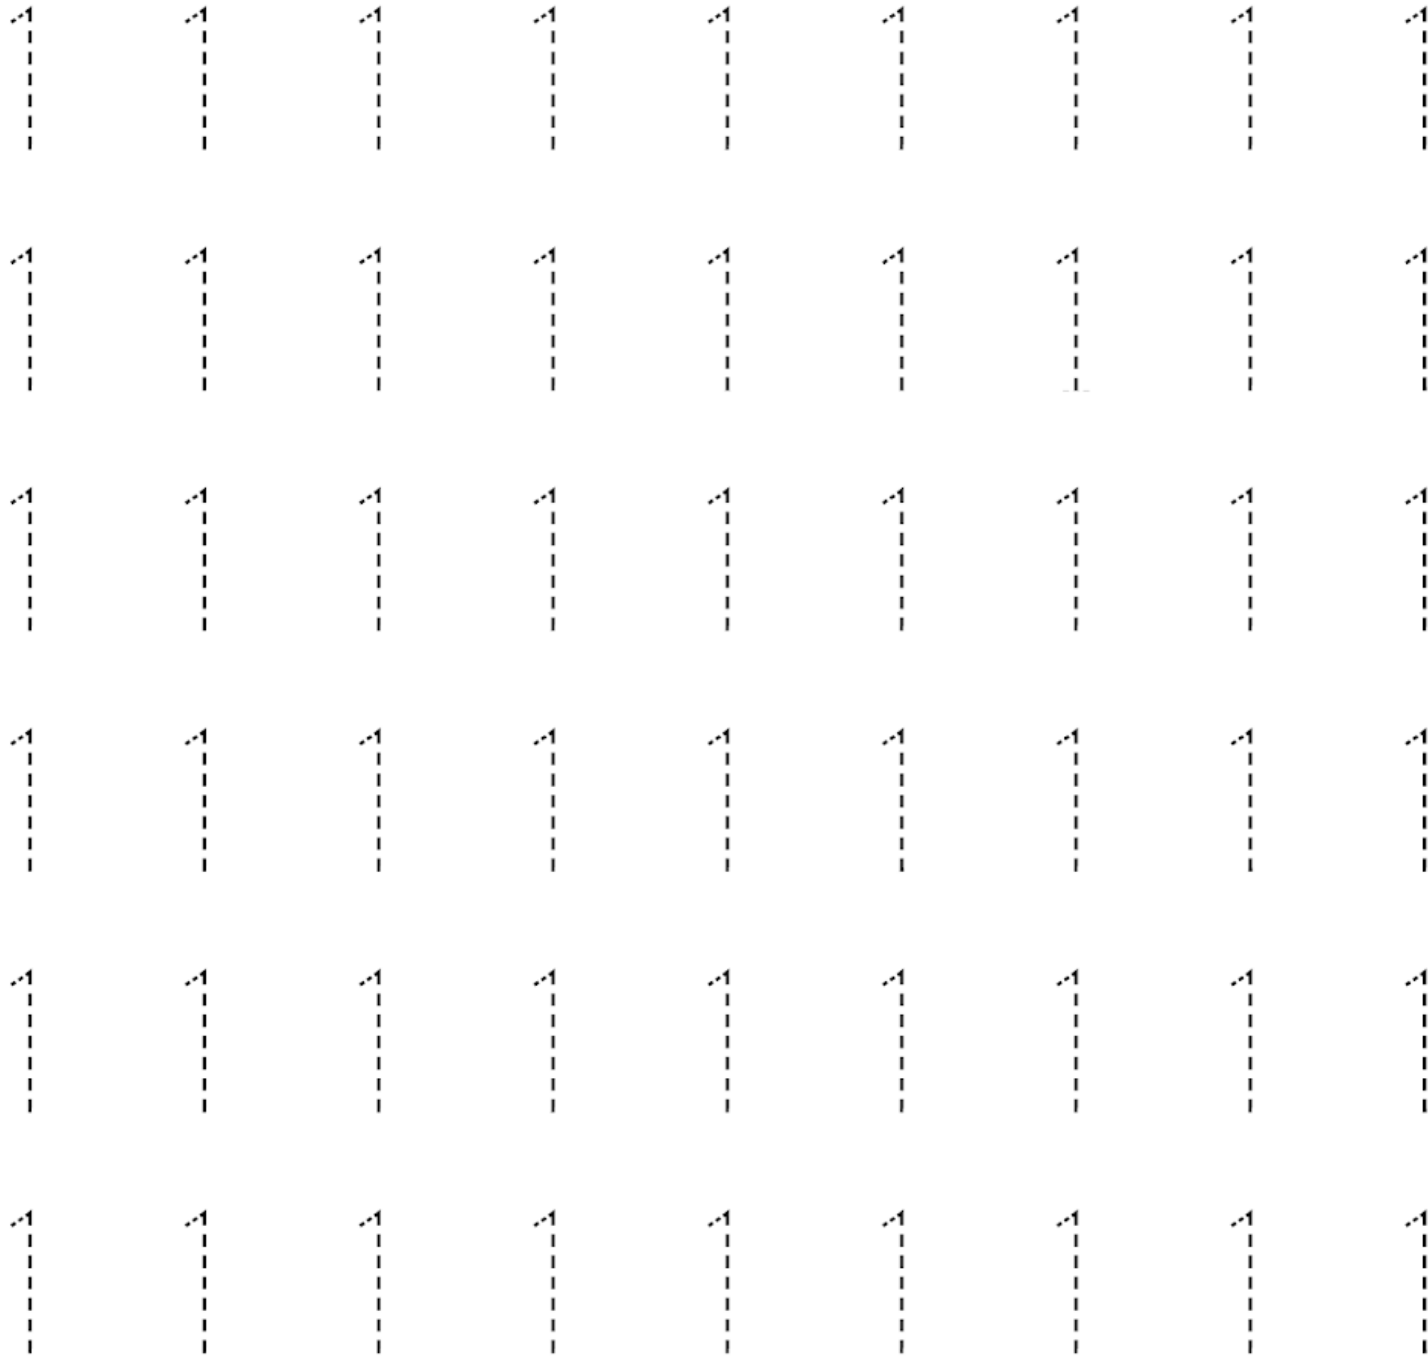

Per imparare a **scrivere i numeri** dobbiamo aiutarci con una serie di schede di pregrafismo, sfruttando la ripetizione per imparare la scrittura

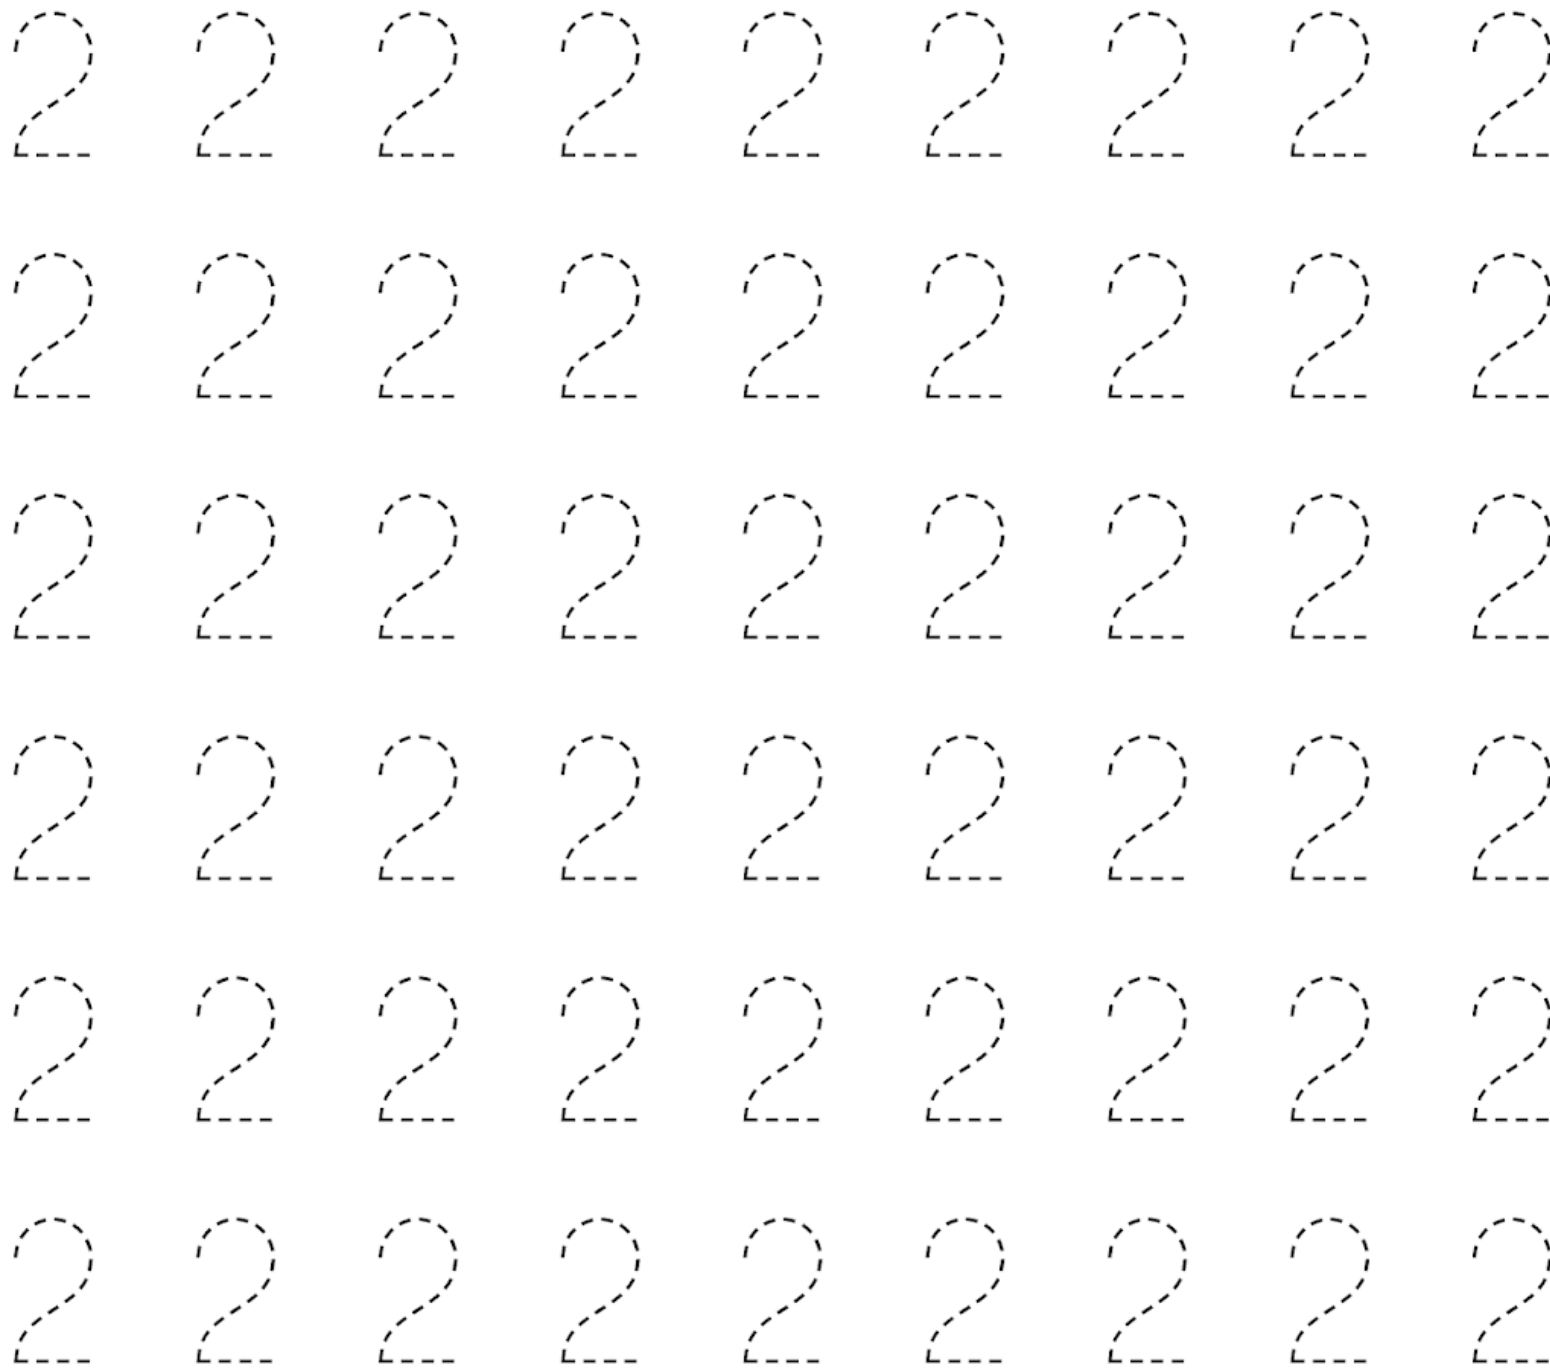

Nelle prossime pagine verranno fornite una serie di schede di pregrafismo: affrontatele con pazienza e cercate di rafforzare la scrittura dei numeri abbandonandole piano piano!
